// WHO WE ARE

The AI+ Studio: how we help you

Harness the power of generative AI for innovation, learning, and discovery.

Use our local LLMs	Studio laptops run small AI models **offline**. **No token limits**, and your data **never leaves the machine**.
Talk to an AI specialist	Stop by the Ask Us @AI desk outside the Studio, or book a session at lbry-aistudio@arizona.edu.
Workshops and events	New AI tools for student success every week. Drop in, or join a scheduled workshop like this one.
Partner with us	Faculty, staff and campus groups can book the Studio for their own AI workshops, events or a game-show style AI challenge.

// TODAY'S PLAN

What we'll cover today

01	**What it is**	The rename, ways in, and how it differs from the Gemini app
02	**The layout**	3 segments of Gemini Notebook - Sources, Chat, Studio
03	**Sources and research**	Find, add and organize material with Fast and Deep Research
04	**Chat and notes**	Cited answers, saved notes and chat modes
05	**Studio tools**	Podcasts, quizzes, mind maps, reports and tables
06	**Share and wrap up**	Study together, use it responsibly, prompts to steal, Q&A

// FIRST, A QUICK HEADS UP

New mask, same task

Renamed July 16, 2026

Old notebooks and links still work

Unified under the Gemini brand for seamless integration across Google’s ecosystem

// GETTING IN

Three ways in: Web, Mobile app, Apps launcher

Same account, same notebooks. Pick the one that fits the moment.

On the web

OPEN
notebook.google.com in any browser

SIGN IN
Your UA NetID

BEST FOR
Building and organizing notebooks

On your phone

GET IT
App name - Notebook

NEEDS
iOS 17+ or Android 10+, free

BEST FOR
Listening audio overviews & quick questions

ANOTHER WAY IN
Open the Google launcher (9 dots), scroll down, select Notebook icon

// BEFORE WE DIVE IN

Let’s experience something cool

Listen to an AI podcast that Gemini Notebook made with a single click.

Guess: how long did it take to make?

// THE BASICS

Gemini Notebook at a glance

A free, AI-powered research and note-taking app from Google, formerly NotebookLM. It helps you analyze, summarize and learn from your own documents.

WHO BUILT IT

Google

Built by Google Labs, Google's team for AI experiments

WHEN

Since 2023

Shown as Project Tailwind in May 2023, launched that July

WHAT POWERS IT

Gemini

Runs on Gemini, the same AI behind Google's Gemini app

Sources · what you can upload

PDF · Docs · Slides · Sheets · Web · YouTube · Audio · Images · TXT/CSV · EPUB

Chat

Ask, get cited answers

You get

Cited answers · Podcasts · Quizzes · Flashcards · Mind maps

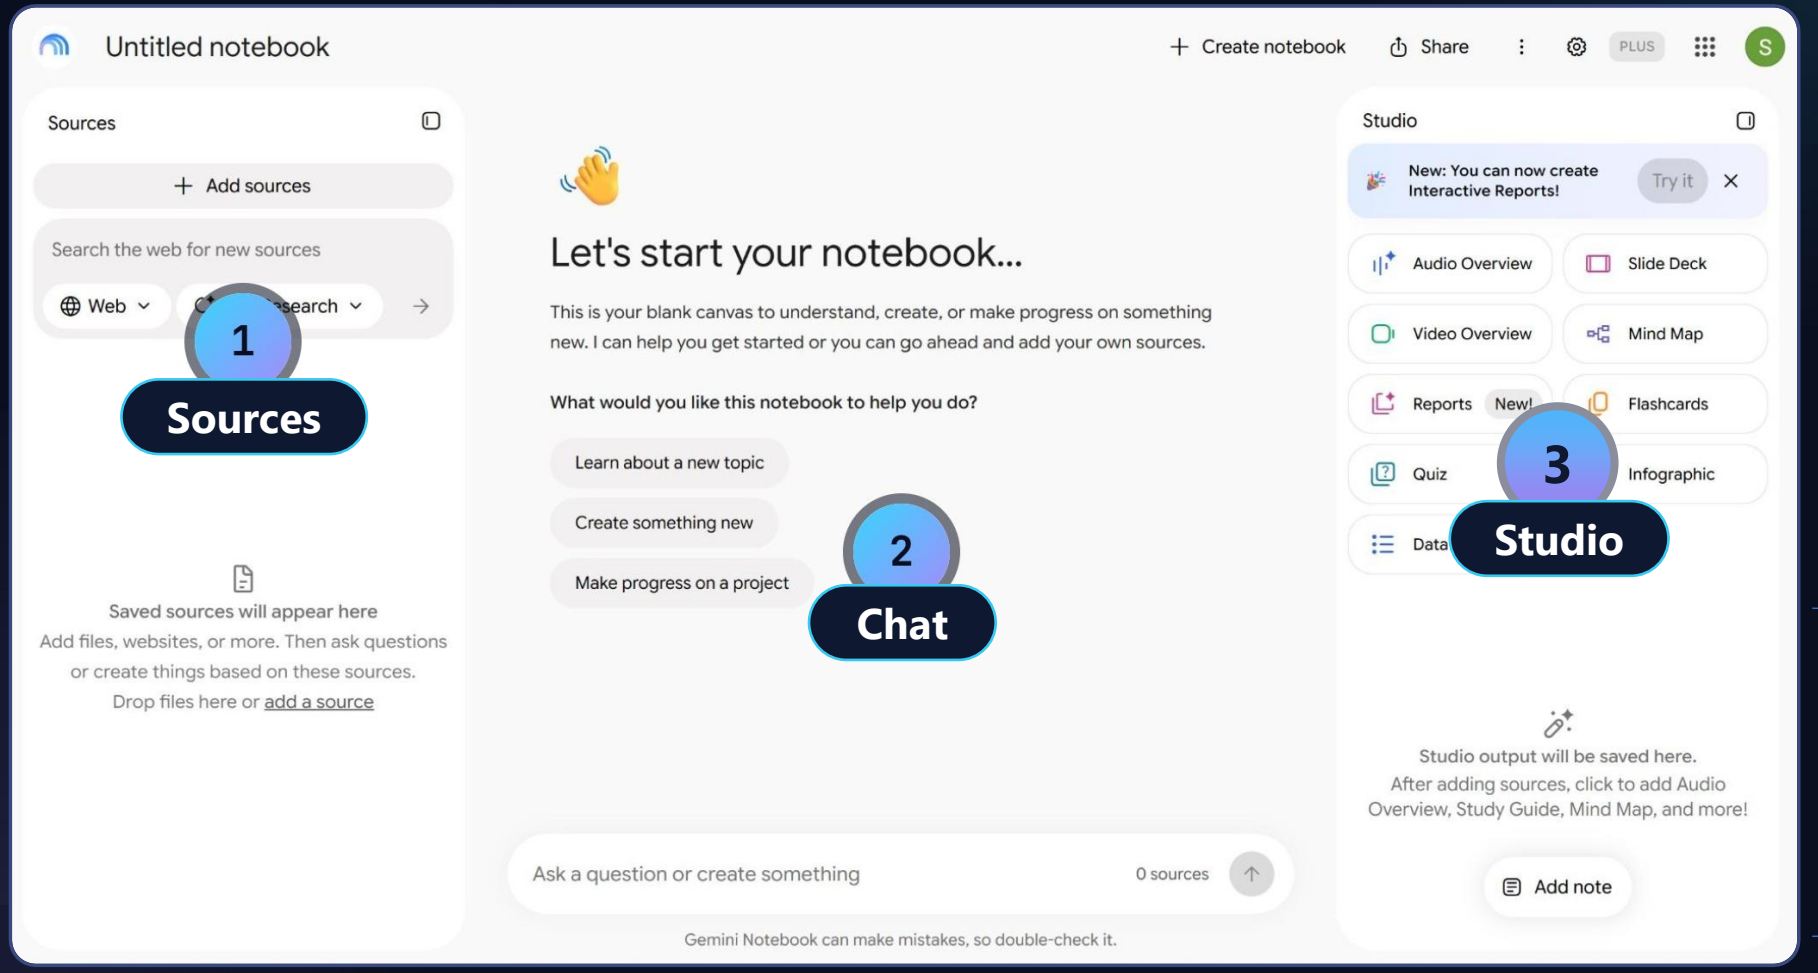

// WHY NOT JUST USE GEMINI?

Gemini Notebook vs. the Gemini app

	Gemini Notebook	Gemini app
Grounding	Locked onto the sources you add	General assistant; needs careful prompts to stay on topic
Knowledge	Answers only from your uploads	Can blend in outside facts from its training
Citations	Automatic, linked to the exact passage	Only when asked, and they can be vague
Study tools	One-click podcasts, guides and quizzes	Takes several prompts to build the same

// THE LAYOUT

Three sections, one notebook

// OUR DATA

Our data sources

We will work with two types of data sources:

1 Artificial intelligence data

Includes

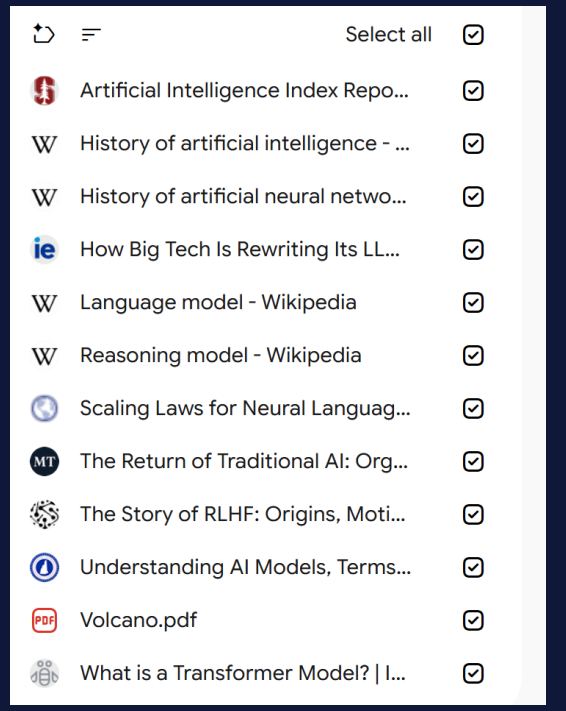

11 sources: AI Index report, Wikipedia histories, and articles on LLMs, transformers and RLHF

2 Volcano data

Includes

1 source: Volcano.pdf

Sources in our notebook

Hands-on Demo

// THE SOURCES TAB

Three ways to bring in sources

Upload your own files, or describe a topic and let Gemini Notebook search for you:

Fast Research

Searches
The web and your Google Drive

Best for
Quick picks in seconds

Deep Research

Searches
The web only

Best for
A full report plus suggested sources

Create a note

Start from
A Gemini answer, or your own typing

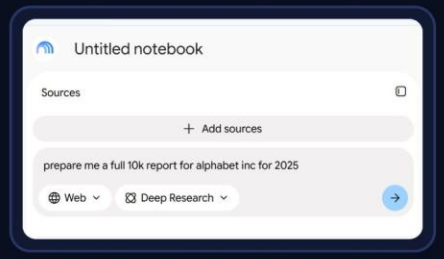

Then
Add it as one of your sources

1 · Describe your topic → 2 · Pick Fast, Deep or Add note as source → 3 · Choose what to import

// SOURCES · DEEP RESEARCH

Deep Research, step by step

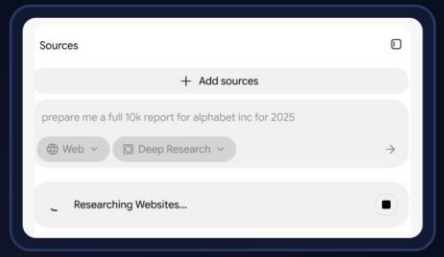

1

Type a topic, pick Deep Research

Example: “prepare me a full 10-K report for Alphabet Inc for 2025”

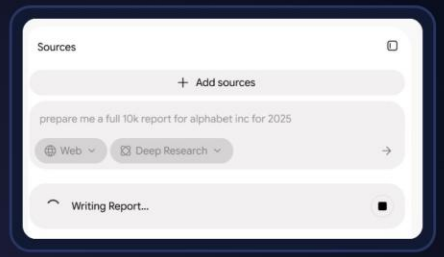

2

It researches websites

You’ll see “Researching websites…”

3

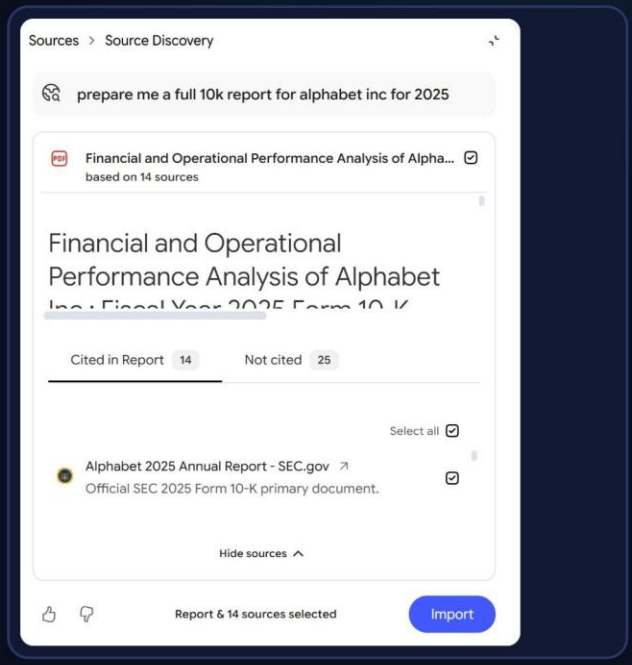

It writes a report

This can take a few minutes

4

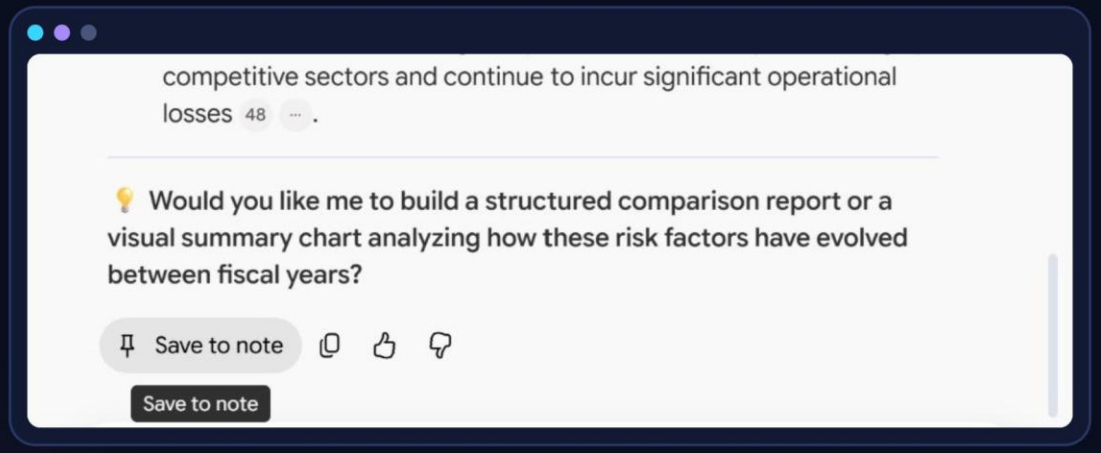

Review, then Import

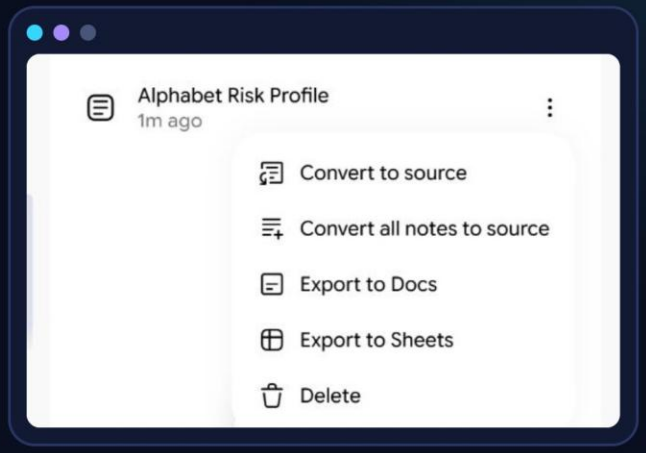

Keep the report and the sources you want

// THE CHAT SECTION

Ask, save, reuse

Save to note

Pins any answer to your notebook, so you can find it later without scrolling.

Export

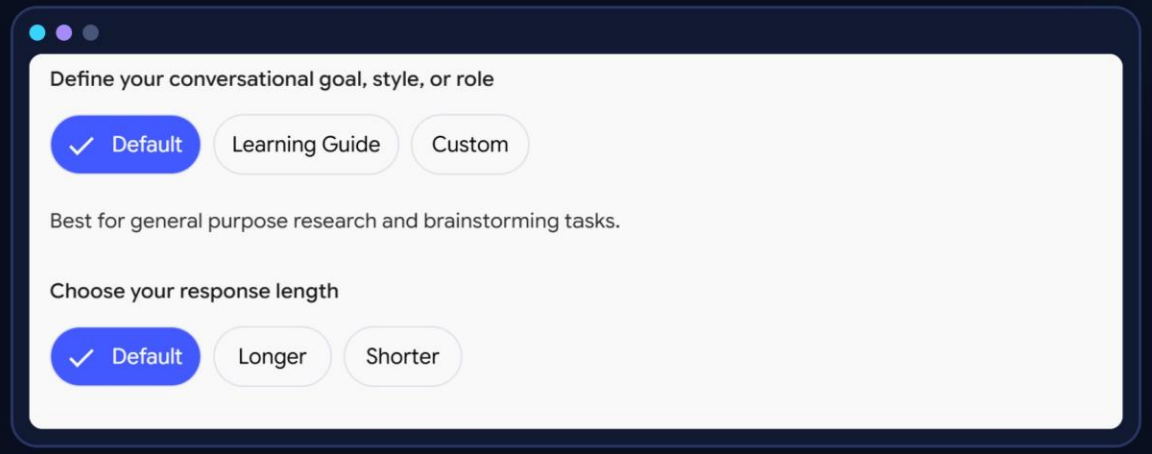

Send notes made by Gemini to Google Docs or Sheets.

Make it a source

Turn notes into sources the notebook can use in future answers.

// BEFORE STUDIO: CONFIGURE THE CHAT

Give the chat a job

Default

For research and brainstorming: straight answers with citations.

Learning Guide

For studying: it asks you questions and works through ideas with you.

Custom

Set any role or style (up to 10,000 characters) and answer length.

// TRY IT NOW · 3 MINUTES

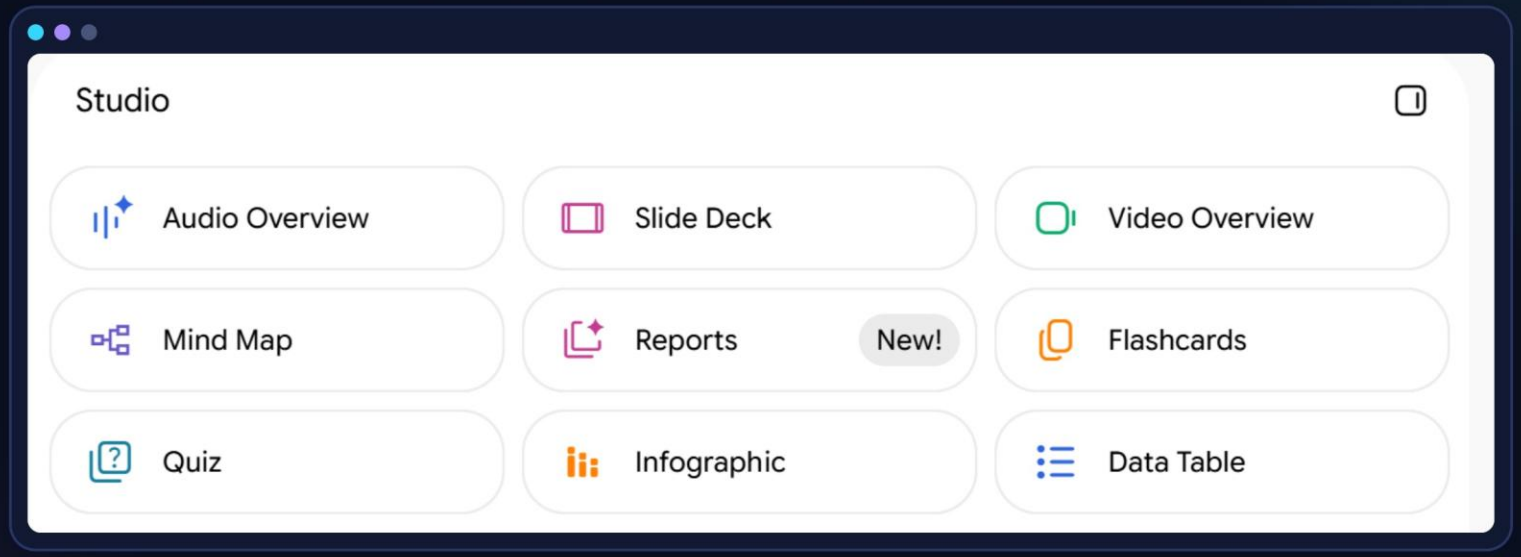

Turn on Learning Guide, then ask:

> **“Walk me through the cardiac cycle, one step at a time.”**

Bonus: switch to Custom and type “Act as a physiology TA for first-year students.” Notice how the tone changes.

// STEP INTO STUDIO

One click, nine study tools

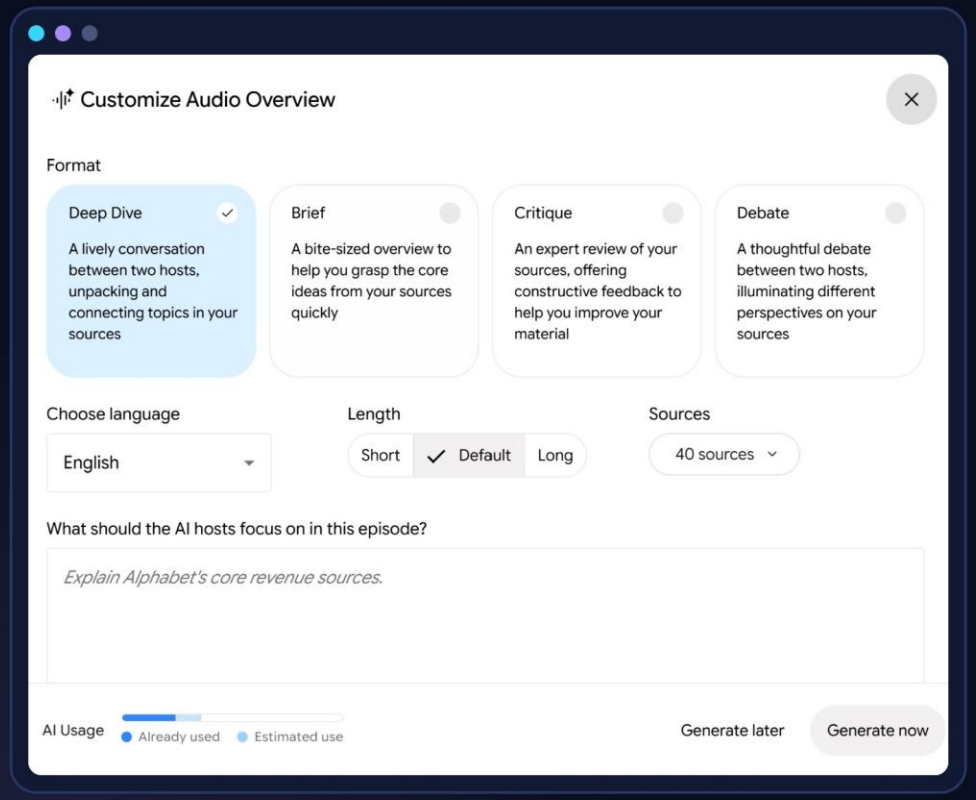

Every tool takes instructions: “focus on chapter 3”, “for beginners”, “in Spanish”.

Audio and video take a few minutes. Start them first, explore while they cook.

// STUDIO · AUDIO OVERVIEW

Your notes, as a podcast

Deep Dive
Two hosts unpack and connect everything

Brief
Just the big ideas, fast

Critique
Expert feedback to improve your work

Debate
Two sides: pros, cons and conflicts

Also pick: language · length · which sources · what to focus on

Interactive mode: jump into the episode and ask the hosts questions live.

// STUDIO · VISUAL TOOLS

Watch it, map it, see it

Video Overview NEW

Narrated explainer, now also 60-second Short Videos in 80+ languages.

Try: mitosis vs. meiosis

Mind Map

A clickable map of every topic. Click a bubble to ask about it.

Try: types of chemical reactions

Infographic

A one-page visual. Pick a style like Scientific or Sketch Note.

Try: the Krebs cycle

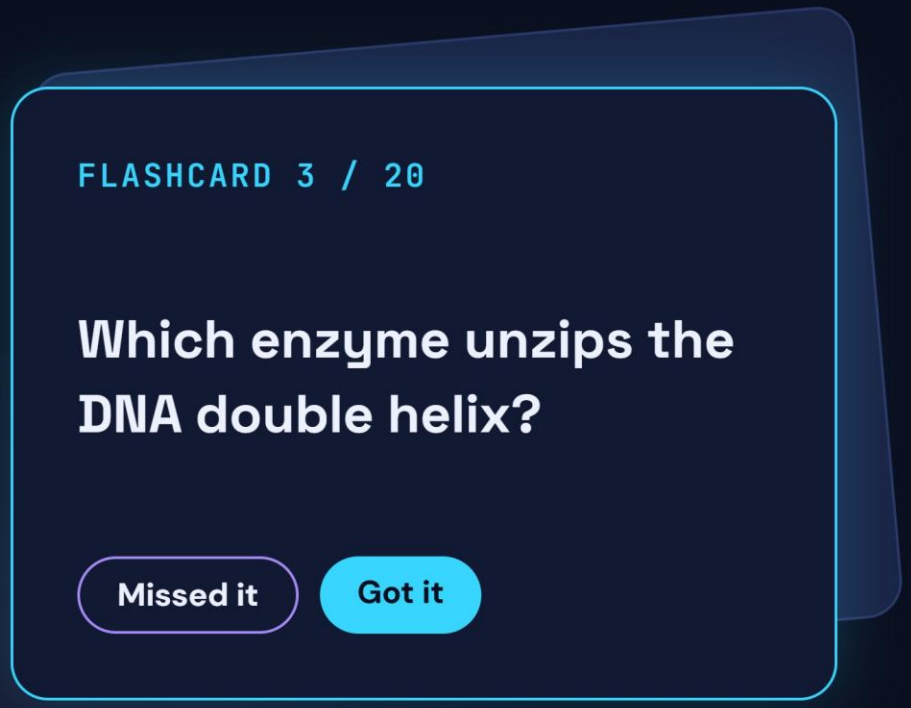

Slide Deck

Auto-built slides. Give feedback per slide, export to PDF or PPTX.

Try: the nervous system

// STUDIO · PRACTICE

Quiz yourself before the prof does

Flashcards
Pick how many and how hard. Rerun the ones you missed.

Quizzes NEW
Multiple choice now. Short answer, multi-select and fill-in-the-blank are on the way.

Ask "How did I do?" NEW
The chat looks at your results and tells you what to review.

Make it yours
Edit cards or add your own questions.

// STUDIO · REPORTS AND TABLES

Reports and tables, done for you

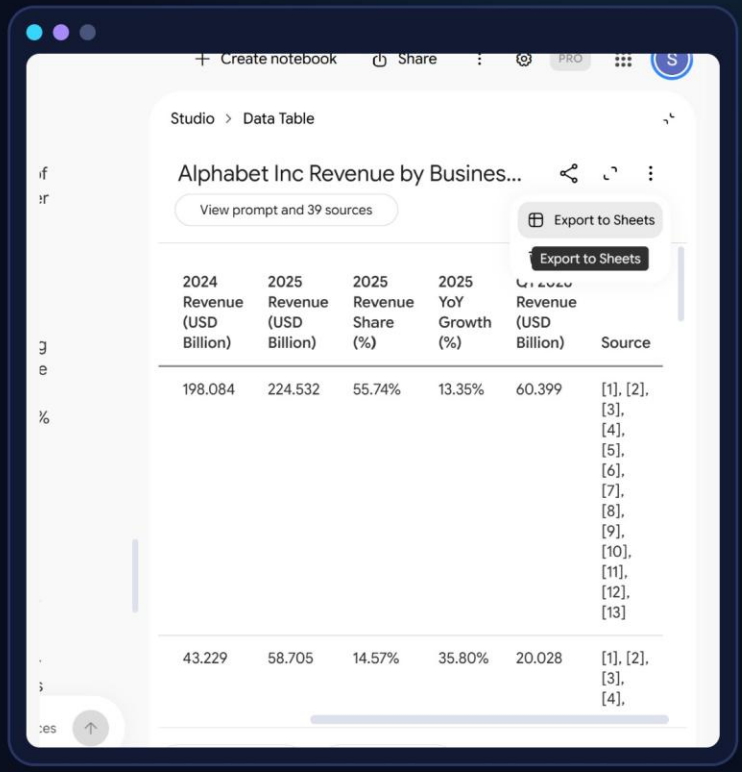

Reports

Study guides, briefing docs, or any format you describe.

New: interactive learning overview puts a summary, infographic, quiz and flashcards on one page.

Data Table

Pulls facts from all your sources into one table. Then hit Export to Sheets.

// SHARE

Study together

Share it all

Classmates get your sources, chat and Studio outputs.

Chat-only

They can ask questions but can't see or edit your sources.

Copy it NEW

Duplicates sources and Studio outputs. Chat and personal notes stay with you.

Your chat history is always private.

UA accounts may only share with UA users.

// BEFORE YOU GO

Use it responsibly

Check the citations

Especially numbers, formulas and anything clinical.

Mind copyright

Upload your own notes and open textbooks like OpenStax.

Use your UA NetID

Not personal Gmail. Skip personal or health info.

Follow the syllabus

Studying with AI is different from writing graded work.

Ask before recording

Get the instructor's OK before recording a lecture.

Treat outputs as study aids

AI hosts can oversimplify. Label AI-made visuals.

// KEEP THIS

Prompts to steal

CHAT

"What are the 5 most likely exam topics here? Cite each one."

CHAT

"Quiz me one question at a time. Don't show the answer until I try."

AUDIO

"Focus only on chapter 3. Audience: pre-nursing students."

AUDIO

"Debate format: one host argues for X, the other for Y."

FLASHCARDS

"20 cards, hard, focus on definitions and mechanisms."

REPORT

"Study guide: key terms, 5 practice questions, common mistakes."
